Carbon Reduction Plan Template

Supplier name: …Avantis Performance Ltd…….

Publication date: …05/02/2026…….....

Commitment to achieving Net Zero
Avantis Performance Ltd is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint
Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2025	
Additional Details relating to the Baseline Emissions calculations.	
2025 is our first year of reporting emissions. As a small lean company we have minimal office and facilities emissions (0.4tCO2e, whilst most of our emissions relate to business travel, with 2.45tCO2e relating to private car use and 1.75tCO2e relating to train travel.	
Baseline year emissions: 2025	
EMISSIONS	**TOTAL (tCO_2e)**
Scope 1	**0**
Scope 2	**0.53**
Scope 3 (Included Sources)	**5.6**
Total Emissions	**6.13**

Current Emissions Reporting

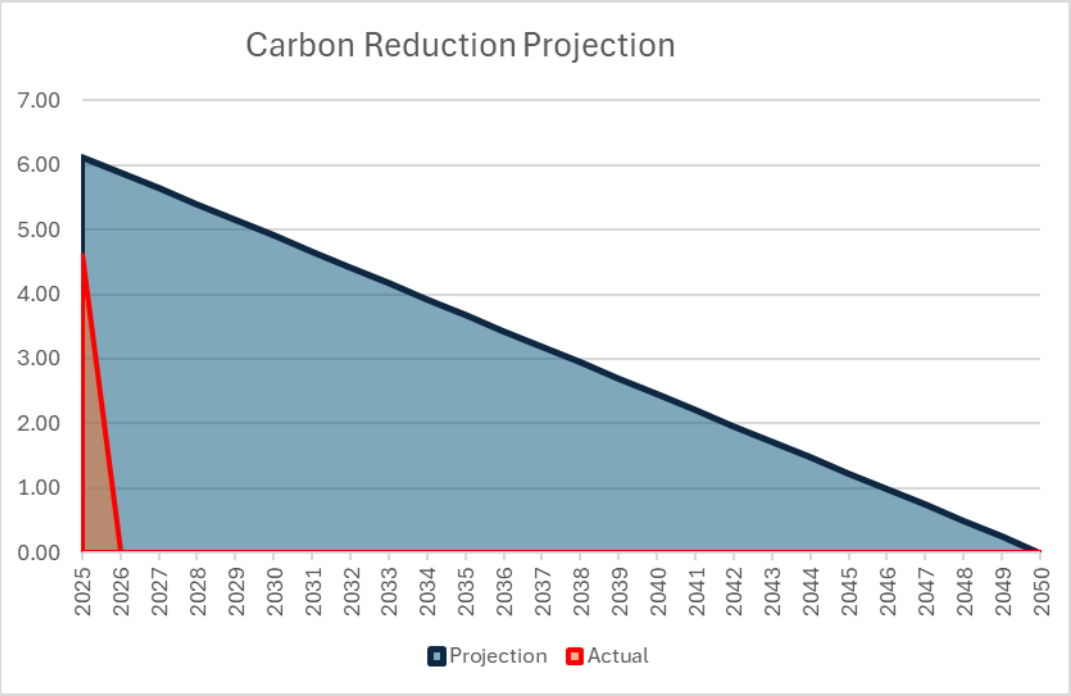
Reporting Year: 2025 (Partial)	
EMISSIONS	**TOTAL (tCO_2e)**
Scope 1	**0**
Scope 2	**0.4**
Scope 3 (Included Sources)	**4.2**
Total Emissions	**4.6**

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 3.7 tCO2e by 2030. This is a reduction of 20%

Progress against these targets can be seen in the graph below:



Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2025 baseline. The carbon

emission reduction achieved by these schemes equate to 0 tCO_2e, a 0%ge reduction against the 2025baseline and the measures will be in effect when performing the contract. As 2025 is our baseline and first year of measuring our carbon emissions there is 0 change.

Future carbon reduction initiatives
In the future we hope to implement further measures such as:
The two major categories of carbon emissions are business travel and facilities.

For business travel we will encourage and incentives staff to use sustainable travel approaches such as public transport, car sharing or other carbon neutral travel mechanism.

For facilities, we will continue to use environmentally friendly sources of energy, and invest in technologies such as solar to reduce our carbon emissions.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard[1] and uses the appropriate Government emission conversion factors for greenhouse gas company reporting[2].

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard[3].

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
